- Introduction to Laravel
- Web Development

LANGUAGES

- **Amharic:** Native
- **English:** Professional

DANIEL ZIGABE MINDA

Junior Software Developer | Web & Mobile Application Developer

PROFESSIONAL SUMMARY

Computer Science student with hands-on project experience designing and developing web and mobile application concepts using Nuxt 4, Vue.js, Laravel, Flutter, and MySQL. Interested in responsive user interfaces, REST API integration, and database-driven systems. Seeking a junior developer or internship opportunity to contribute, learn, and build reliable software.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

2 Months

Ewenet Communication PLC | Addis Ababa, Ethiopia

- Worked with Nuxt.js for frontend development and gained practical exposure to Flutter mobile application development.
- Contributed to the development workflow for a web and mobile sports platform.

SELECTED PROJECTS

CombolojoSPORT — Sports Venue Booking Platform

Tech Stack: Nuxt 4, Laravel, Flutter, MySQL

- Designed a platform concept for discovering sports venues and events, featuring public pages and role-based dashboards.
- Planned mobile-app-based venue booking and seamless frontend/backend API integration.

Internship Attendance & Advisor Management System

Tech Stack: Nuxt 4, Laravel, MySQL

- Developed project concepts and workflows for student internship records, attendance, weekly reports, and supervisor evaluations.
- Planned QR- and GPS-supported attendance verification for academic advisor monitoring.

Personal Portfolio Website

Tech Stack: Nuxt 4, Vue.js, TypeScript, Tailwind CSS

- Building a responsive portfolio to present projects, technical skills, education, and experience with a modern interface.
